

Structural Steel Division

Swanton Welding and Machining Company, Structural Division is your one stop Structural Steel supplier featuring the best technology available. Established in 1956 we have the experience to insure a quality and on time delivery at a competitive price. The Structural Steel Division can fabricate everything from stairs, handrail, caged ladders, to mezzanines, canopies, or an entire building. All of our welders are certified to insure quality welds every time. We have on site painting that will paint your job to your specification and satisfaction. Our detailers are qualified and experienced using the latest software available. We also have our own fleet of trucks and trailers to get your job to you fast.

Laser/Water Cutting Division

Our Laser, Water and Plasma Cutting Division can cut anything that you need. We can cut from small prototype quantities to full production runs. With (2) Trumpf Lasers, 60" x 120" Table, (2) Flow Waterjets, 72" x 144" Table, and a Messer High Definition Plasma, 126" x 252" Table, we are set to be your one stop cutting source. We can cut from gauge material up to 8" with our Lasers, Waterjets and Plasma. We can also press brake your parts with CNC accuracy with our Adira Press Brake. With 175 Ton capacity we can press brake 1/4" steel 14 ft. long. Sanding and polishing are also a part of our capabilities as well as machining and painting.
