### Swanton Welding & Machining Co. says Thank You

All of us at Swanton Welding & Machining Co. would like to extend our sincerest and heart felt THANK YOU to all of our customers and friends for making 2007 another great year for us here at Swanton Welding.

It is because of the trust you have placed in us that has made us one of your valued vendors and made you one of our most important customers.

Being true to our goal of continuous improvement and growth, 2007 was a year of new equipment, state of the art technology, improved quality, better on time delivery and continued employee training.

2007 was a year of reaching out to a wider and more diversified customer base with customers now in Alabama, Ohio, Michigan, Indiana, Georgia, Tennessee, South Carolina, New York, and Pennsylvania.

### New for 2008

We have just purchased and installed a brand new state of the art paint booth. Measuring 32' wide x 75' long x 28' high. We now have the ability to apply a baked on finish.

We are also planning to purchase a Pangborn Blasting System that will give us the ability to clean your material to any specification.

It is, and has always been our goal to continually improve our service in every aspect. Whether it is competitive prices, great quality or just being the best shop to work with, Swanton Welding & Machining Co. is always striving to be the best. We want to be the best because we believe that we serve the best companies anywhere.

It has been our greatest pleasure serving your company in 2007. We are looking forward to 2008 with great anticipation. Working together with you 2008 as a team should make 2008 the best year ever.

Sincerely,

All the staff at Swanton Welding & Machining Co.

With our Ficep Beam Line and New Geka Iron Worker we have eliminated 95% of operator error when it comes to putting holes in beams, channel, and angle.
